1" KO Masonry Box

Steel City®

1" KO Masonry Box

Lets You Step Up to 1" Pipe, Adding Capacity to Accommodate Extra Wiring Conductors

Today's school and light commercial construction is requiring more wiring capacity than ever before for power, data, voice, video and security. The extra conductors are rapidly making 1" conduit a common upgrade. Until now, there hasn't been a masonry box factory-made to accept 1" pipe.

In response to this application, Thomas & Betts introduces the first 1" KO masonry box. No more need to waste time and labor at the jobsite, punching large KOs to accept 1" pipe. In addition to the four standard knockouts, this single-gang, welded-steel box features a total of four factory-made 1" knockouts — ideal for terminating 1" conduit in concrete block or pre-formed poured concrete walls!

Ideal for concrete/masonry walls in:

- Schools
- Shopping centers
- Medical complexes
- Small office buildings
- Other light commercial construction requiring extra wiring capacity

- The first factory-made 1" KO masonry box available
- 1" knockouts support larger conduit for extra wiring capacity
- Saves time and labor by eliminating the need to modify standard boxes to fit 1" conduit
- Stable, welded steel, single-piece masonry design for heavy-duty applications
- Steel City quality — won't deform after installation
- KOs on top, back and bottom for flexible conduit installation
- UL® Listed

1" KO Masonry Box

Cat. Number	Description	Knockouts	Std. Pkg. Qty.	UPC Number
GW-135-NG-1	1" KO Single-Gang Masonry Box, 3½"D x 3¾"H (non-gangable)	(4) 1" (1 top, 1 bottom, 2 end) (4) ½" & ¾" eccentric (2 each side)	20	785991-04449
